Introduction

a. System Overview

Farmer Payment System developed by UniverSL Software Solution (Pvt) Ltd is a web based solution which can also be used in your local environment.

System Requirements:

1. Windows Xp, Vista, Seven or Eight
2. Wamp Server 2.0 or Above
3. Web Browser (Mozilla firefox is recommended)
4. Minimum Computer Specs : Dual Core 2.0, 1GHz, 256 MB RAM, 1GB Space)

System Components:

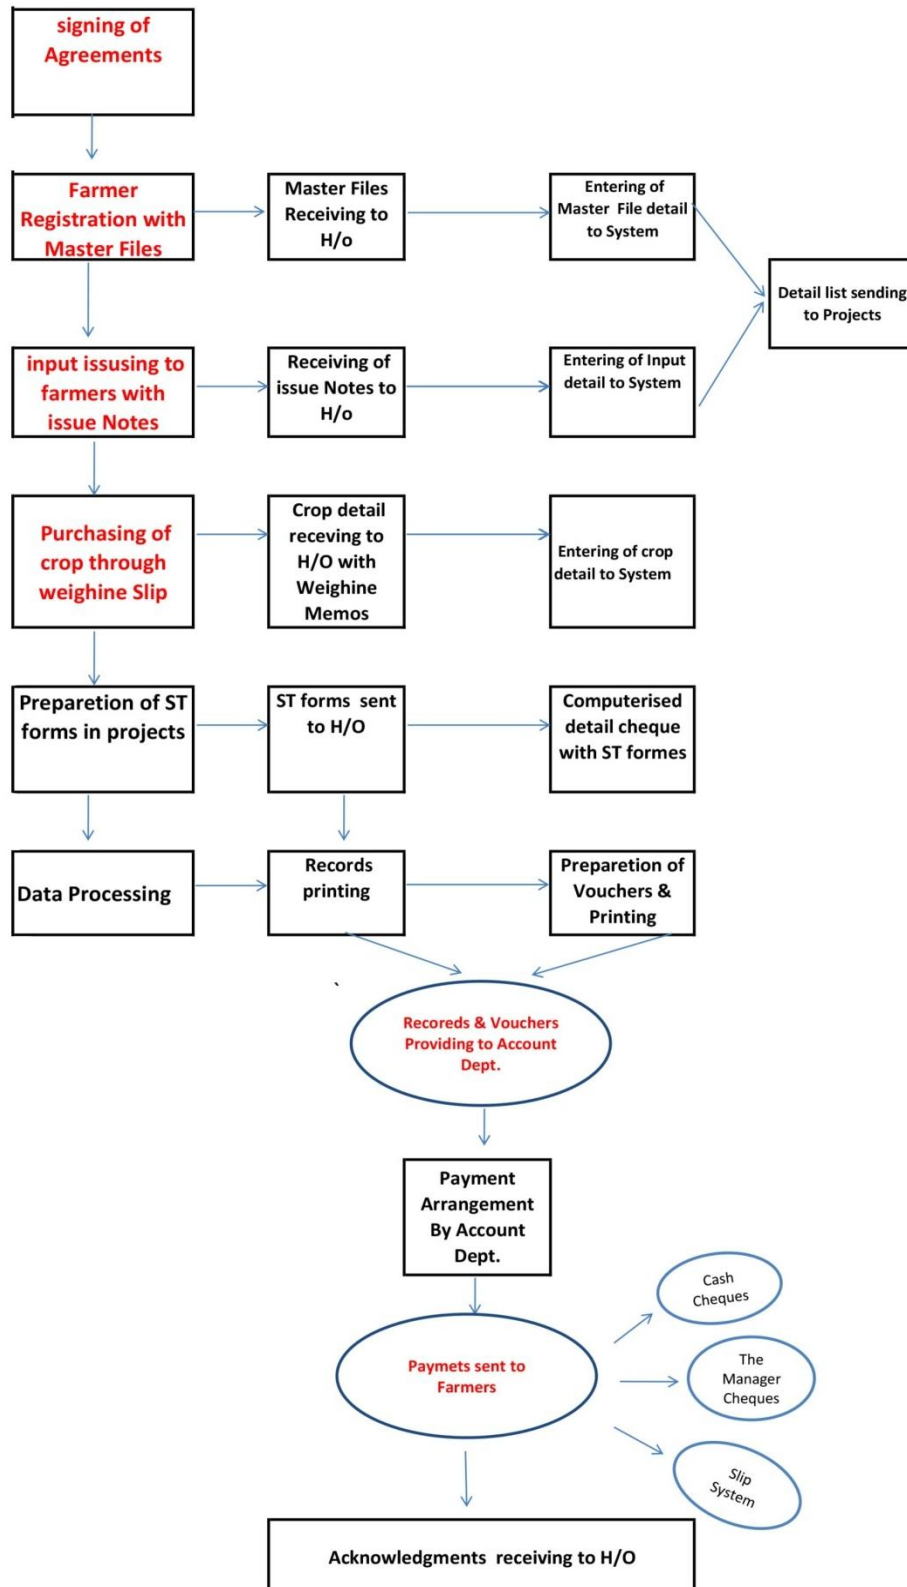

1. File Module
2. Posting Module
3. Processing Module
4. Report Module

b. Business Process

Following Diagram explains the business process of the supply chain. It goes through steps such as:

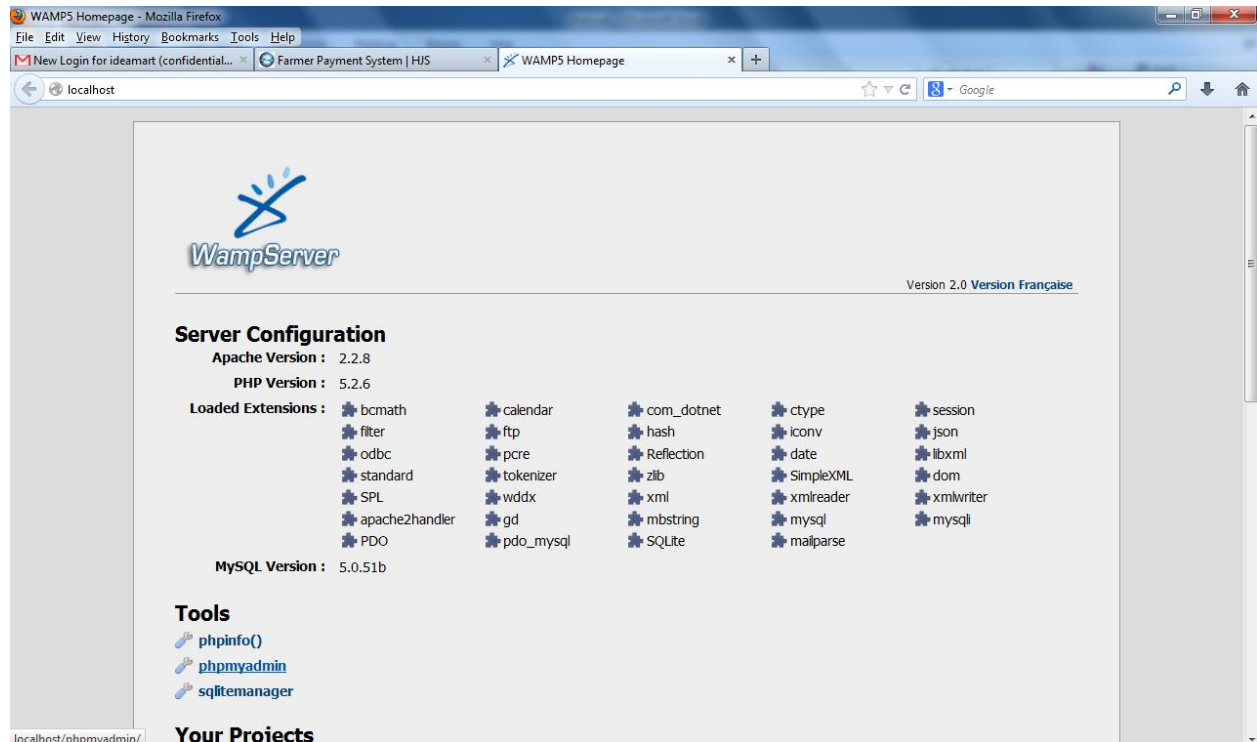

1. Farmer Registration
2. Providing Farmer Inputs
3. Providing Cash Advance to External Suppliers
4. Receiving Crops
5. Defining Rates
6. Processing Payment
7. Transfer Payment
8. Issue Receipts
9. Report Generation
10. Analyze Statistics

Create new table on database farmer

Name: Number of fields:

- 3) Create Database with a name . eg :- Farmer
- 4) Import .SQL file
- 5) Set the Database name, username and password in db1.php file.

```
<?php
    $con = mysql_connect("localhost","root",""); // create co
    if (!$con)
    {
        die('could not connect: ' . mysql_error());
    }
    mysql_select_db("farmer", $con); // select database
?>
```

The screenshot shows a Notepad window with the title 'db1 - Notepad'. The menu bar includes 'File', 'Edit', 'Format', 'View', and 'Help'. The code is written in PHP and attempts to connect to a MySQL database on localhost with the username 'root' and an empty password. It then selects a database named 'farmer'. The status bar at the bottom right indicates 'Ln 8, Col 20'.

- 6) Place farmer folder in www (you can rename it).
- 7) Start Wamp Server
- 8) Select folder name from Your Projects menu.
- 9) Login Screen will be displayed
- 10) Login with your username and password to continue.
